

GAURESH NANDKUMAR GOVEKAR

Ajara, Kolhapur 416505 | +91 7038578792 | connectgauresh@gmail.com

[linkedin.com/in/connectgauresh](https://www.linkedin.com/in/connectgauresh) | github.com/gaureshconnects

Career Objective

2025 Computer Engineering graduate specializing in CI/CD automation, cloud-native infrastructure, and DevOps practices, with hands-on experience in Docker, AWS, automated pipelines, and PostgreSQL-backed applications.

Education

Bachelor of Computer Engineering - University of Mumbai

July 2022 - May 2025

Percentage: 60.99% | CGPA: 6.75

Experience

Infosys Springboard – Full Stack Developer

September 2025 - December 2025

Project: Bragboard - Employee Recognition Platform (Full-Stack Web Application)

Tech Stack: React.js, SCSS, FastAPI, PostgreSQL, JWT Authentication, Agile

- Developed using React.js and FastAPI, supporting appreciation posts with tagging, reactions, and comments.
- Built secure REST APIs and implemented JWT-based role management for Admin and Employee access.
- Designed and optimized complex PostgreSQL schemas for many-to-many relationships in tagging and reactions.
- Contributed to Agile sprints, code reviews, and timely module delivery.
- Ensured performance and maintainability through clean architecture and modular coding.

Projects

Automated Directus CMS Deployment & CI/CD Pipeline

[GitLab](#)

Tech Stack: AWS EC2, Docker, Docker Compose, GitLab CI/CD, PostgreSQL, Linux (Ubuntu)

- Deployed Directus CMS and PostgreSQL on AWS EC2 using Docker Compose.
- Built a 3-stage CI/CD pipeline (Validate, Test, Report) using GitLab CI/CD.
- Automated post-deployment verification using curl and Alpine Linux.
- Configured AWS Security Groups for controlled public access and secure SSH.
- Generated Markdown-based deployment reports and pipeline artifacts.

Containerization and Deployment of Wisecow Application on Kubernetes

[Github](#)

Tech Stack: Wisecow (Node.js), Docker, Docker Hub, Kubernetes (Minikube), NGINX Ingress, TLS, CI/CD Pipelines, KubeArmor.

- Implemented end-to-end containerization and Kubernetes deployment of the Wisecow web application.
- Designed a production-style DevOps pipeline using Docker, Kubernetes, and GitHub Actions.
- Enabled secure HTTPS access using Kubernetes Ingress with TLS encryption.
- Built a fully automated CI/CD pipeline for continuous build and deployment.
- Applied DevSecOps principles with optional zero-trust security using KubeArmor.

B.E Computer Engineering Project - Full-Stack Developer

Project: Result Analytics Dashboard (Full-Stack Web Application)

Tech Stack: MERN Stack, Machine Learning Libraries, REST APIs, MongoDB

- Developed an interactive academic dashboard for real-time performance analysis and trend visualization.
- Integrated ML models to predict student performance and suggest actionable insights.
- Designed REST APIs using Express.js and data visualizations with Recharts.
- Published a research paper in IEEE ICSSAS 2025 titled “Result Analytics Dashboard Using Machine Learning”.

Technical Skills

- **Programming Languages:** Java, Python, JavaScript
- **Frameworks & Libraries:** React.js, Next.js, Express.js, Node.js, FastAPI
- **Databases:** PostgreSQL, MySQL, MongoDB
- **Cloud:** AWS EC2 (Security Groups, VPC, S3)
- **DevOps CI/CD:** GitLab CI/CD, Pipeline Optimization, Artifact Management, Docker, Kubernetes
- **Operating Systems:** Linux (Ubuntu, Alpine), Bash Scripting
- **Soft Skills:** Problem-Solving, Team Collaboration, Analytical Thinking, Communication
