Career Objective

Aspiring Software Engineer (2025 Graduate) skilled in Core Java, React.js, Fast API, and PostgreSQL, with hands-on experience in building scalable, cloud-ready web applications. Passionate about developing microservices, REST APIs, and learning cloud-native and DevOps practices in an agile environment to deliver impactful digital solutions.

Education

Bachelor of Computer Engineering – University of Mumbai

July 2022 – July 2025

Scored: 60.99%

Experience

Infosys Springboard – Python Developer Intern

Sep 2025 – Nov 2025

Tech Stack: React.js, SCSS, Fast API, PostgreSQL, JWT Authentication, Agile

Project: Bragboard - Employee Recognition Platform (Full-Stack Web Application)

- Developed using React.js and FastAPI, supporting appreciation posts with tagging, reactions, and comments.
- Built secure REST APIs and implemented JWT-based role management for Admin and Employee access.
- Designed and optimized complex PostgreSQL schemas for many-to-many relationships in tagging and reactions.
- Contributed to Agile sprints, code reviews, and timely module delivery.
- Ensured performance and maintainability through clean architecture and modular coding.

Project Experience

Full-Stack Developer – Result Analytics Dashboard

Tech Stack: MERN Stack, Machine Learning Libraries, REST APIs, MongoDB

- Developed an interactive academic dashboard for real-time performance analysis and trend visualization.
- Integrated ML models to predict student performance and suggest actionable insights.
- Designed REST APIs using Express.js and data visualizations with Recharts.
- Published a research paper in IEEE ICSSAS 2025 titled “Result Analytics Dashboard Using Machine Learning”.

Containerisation and Deployment of Wisecow Application on Kubernetes

Tech Stack: Wisecow (Node.js), Docker, Docker Hub, Kubernetes (Minikube), NGINX Ingress, TLS, CI/CD Pipelines, KubeArmor.

- Implemented end-to-end containerization and Kubernetes deployment of the Wisecow web application. Implemented.
- Designed a production-style DevOps pipeline using Docker, Kubernetes, and GitHub Actions.
- Enabled secure HTTPS access using Kubernetes Ingress with TLS encryption.
- Built a fully automated CI/CD pipeline for continuous build and deployment.
- Applied DevSecOps principles with optional zero-trust security using KubeArmor.

Technical Skills

- **Programming Languages:** Java, Python, JavaScript
- **Frameworks & Libraries:** React.js, Next.js, Express.js, Node.js, FastAPI
- **Databases:** PostgreSQL, MySQL, MongoDB
- **Cloud & DevOps Tools:** AWS (EC2, S3), Git, GitHub, REST APIs, Docker (basic)
- **Methodologies:** Agile, Cloud-Native Development, RESTful API Integration, SDLC
- **Soft Skills:** Problem-Solving, Team Collaboration, Analytical Thinking, Communication

Certifications

- **DevOps foundation certificate** – Infosys Springboard (2026)
- **Continuous Integration and Delivery DevOps** – Infosys Springboard (2026)
- **Python Full Stack Development** – Infosys Springboard (2025)
- **AWS Solutions Architecture Job Simulation** – AWS (2025)
- **JavaScript Programming** – Infosys Springboard (2024)
- **Introduction to LINUX** – IIT Bombay Spoken Tutorial (2024)
